	ESR	Less than 200% of the specified value									
	Leakage current	Less than specified value									
Shelf life (at 150°C)	After 1000 hours no load test, leakage current, capacitance and tan δ are same as load life value. The measurement shall be performed at 20°C by the KS C IEC 60384 - 4										
Resistance to soldering heat	The following specifications shall be satisfied when the capacitors are restored to 20°C after exposing them at 250°C for 10 seconds.										
	Leakage current	Less than specified value									
	Capacitance change	Within $\pm 10\%$ of initial value									
	tan δ	Less than specified value
